Subject: RE: Glyphosate questions

Hello Devi and Forrest,

We have put together a document answering your questions to our best current knowledge of glyphosate's status, which I have attached. Please reach out if you have any questions.

Best,
Andy

Andy Muench (he/him)

Subject: Glyphosate questions

Hi all,

Thanks for the call today. As discussed, here are the questions we have for OPP regarding glyphosate. Feel free to send responses as you have them; this information will help us prepare for the moot on January 6 and oral argument on January 10.

- Does OPP plan to issue a revised ID for glyphosate?

- When?
- What would the revised ID include?
 - Outstanding non-ESA elements (i.e., EDSP determination, EWG petition response, and additional bee data)?
 - Early ESA mitigation measures based on the final BE for glyphosate?
 - Other mitigation measures?
 - Any other changes?
- When would OPP call in glyphosate labels?
 - Any estimates on how long that process would take, from start (calling in labels) to finish (revised labels on the market)?
 - Would the label call-in be conducted concurrently with the revised ID?
 - If the revised ID does not encompass all outstanding non-ESA elements, would this affect OPP's decision as to whether to call in labels? (e.g., if the EWG petition response is still outstanding, would we wait?)
- If OPP does not plan to issue a revised ID, does it plan to take other steps to comply with the 10/1/22 registration review deadline?
- When does OPP expect the Services to issue their BiOps for glyphosate?
 - Have the Services requested an extension to issue their BiOps?
 - If not, does OPP expect to receive an extension request? When?
 - What has the process been for other active ingredients? (is there any precedent?)
 - Once the Services issue their BiOps, any estimates on how long it would take to issue a final decision for glyphosate?
- Are there any Enlist Duo updates relevant to glyphosate and the questions above?

Thanks,
